WiMAX™ Product Guide | December 2011

INTRODUCING:

WiMAX FORUM® | mobba™

MARKETPLACE

The WiMAX Forum is proud to announce the opening of the WiMAX Forum | Mobba Marketplace- An easy to use, cloud-based purchasing portal service for WiMAX operators and manufacturers.

- WiMAX operators can unite to lower cost and gain access to new products
- WiMAX vendors will gain higher volume and access to new customers
- Service is FREE to all WIMAX Forum members

A new online exchange hosted by the WiMAX Forum utilizing the proven Mobba group buying platform

WiMAX Forum 95

Introduction

Dear Reader,

In August of 2010 the WiMAX Forum released the first WiMAX Product Guide. That guide provided information on more than 280 WiMAX end-user devices that were immediately available. This year for our second edition, the WiMAX Product Guide includes information on more than 340 end-user devices, all available today. This includes 13 smart phones, 9 tablets, 22 portable hotspots, and much more.

WiMAX technology is available today. It is in use in almost 600 deployments across 150 countries, and WiMAX networks currently cover more than 823 million people globally. WiMAX technology is proven and trusted to deliver cost-efficient broadband connectivity. The devices included in this guide provide access to broadband for over 20 million WiMAX subscribers globally, and that number is increasing rapidly.

We hope that this Device Guide shows you the power of our ecosystem. The WiMAX Forum® is an industry-led, not-for-profit organization that certifies and promotes the compatibility and interoperability of broadband wireless products based upon the IEEE's 802.16 standard.. The WiMAX Forum's primary goal is to accelerate the adoption, deployment and expansion of WiMAX technologies across the globe while facilitating roaming agreements, sharing best practices within our membership and certifying products. WiMAX Forum Certified® products are interoperable and support broadband fixed, nomadic, portable and mobile services. The WiMAX Forum works closely with service providers and regulators to ensure that WiMAX Forum Certified systems meet customer and government requirements.

If you have questions about the WiMAX Forum visit *www.wimaxforum.org* for more information.

Best Regards,

Declan Byrne
Director of Marketing
The WiMAX Forum

Smart Phones

Comsys

MOBILE A0515

Tri-Mode WiMAX/GSM-EDGE/ WLAN Reference Entry-level Feature Phone.

dmobile

WiMAX Internet Device

4.3-inch touch screen of 800 x 480 resolutions with perfect responding to your fingers gestures when operating the options, browsing the web, scrolling through contacts, and launching media.

http://www.dmobile.cc/m0.html

HTC

EVO 4G (WiMAX)

With the first 4G phone on the nation's first 4G network, you can upload, download and scour the web up to 10x faster than ever before. With instant Internet access for up to 5 computers, the EVO 4G opens up all kinds of possibilities. Now, the world is your coffee shop.

http://www.htc.com/us/products/evo-sprint

Smart Phones

HTC

EVO 3D

The EVO™ 3D doesn't require you to wear anything special to get fully immersed in its 4.3" 3D QHD screen. From watching movies in 3D, to taking 3D pictures with its 5 MP screen, to capturing your own 3D video, nothing more is needed by you. Except the desire to be WOW'd.

http://www.htc.com/us/products/evo3d-sprint?view=1-1&sort=0#overview

HTC

EVO Shift 4G

With an 800 MHz processor on Sprint's 4G network, you've got more brainpower on top of bandwidth than you'll know what to do with. With a built-in QWERTY keyboard, you can crank out texts, emails and updates in no time flat. And you can say it precisely like you (not "U") mean it.

http://www.htc.com/us/products/shift-sprint

HTC

MAX 4G (WiMAX)

The HTC Max 4G is world's first 4G mobile phone, fast enough to load whole websites or stream live TV, movies and music in a flash. It has a built-in camera and a 3.8 inch glass touchscreen.

http://www.yota.ru/en/htc_max_4g/main/

LG

KC1TOBCK-K1

LG KC-1 is a PDA phone with WiBro, CDMA, T-DMB and Bluetooth RF module. It has 2.8 inch LCD and 806 MHz Marvell Monahans CPU.

Huawei

BM626

Huawei BM626 is a WiMAX CPE specifically for multi-user family and enterprise users. The BM626 is designed in compliance with IEEE802.16e 2005. The BM626 enables you not only to set up a local area network (LAN) flexibly, but also to access the Internet in a wireless mode. Besides, as an alternative, WiFi Air Interface supports a flexible data communication system by the air interface rather than traditional cable within a building or other small locations.

Huawei

BM622

Huawei EchoLife BM622 is a WiMAX CPE specifically for single family and enterprise users. The BM622 is designed in compliance with IEEE802.16e-2005. The BM622 enables you access the Internet in a wireless mode.
The BM622 provides the wireless Internet accessing function, the routing function and network address translation (NAT) function, and provides an access rate up to 20Mbps downlink and 5Mbps uplink on WiMAX network.

OPPOSITES ARE ATTRACTIVE.
A MOBILE STANDARD FOR THE COST OF A FIXED NETWORK.

With our Point-to-Multipoint (PMP) 320 wireless broadband and access network solutions, you get the best of two seemingly opposite worlds: the power of the 802.16e standard, and the low cost of a fixed licensed 3.3-3.8 GHz outdoor solution. So you can extend coverage to new subscribers, reach low-density areas, or add licensed connectivity to your unlicensed network - at a surprisingly affordable total cost of ownership. And that makes it a very attractive way to generate new sources of revenue and profit.

JRL-900

JRL-900 is outdoor-installable Mobile WiMAX CPE. JRC NDT-950 WiMAX module, MIMO-antenna, and broadband router are embedded in its compact housing. JRL-900 Outdoor CPE is an ideal device for fixed usage in Mobile WiMAX network such as IP camera surveillance, regional information distribution as well as broadband access services. Stable link with lower loss in outdoor installation will provide higher performance in communication channels.

The product is an Outdoor grade can with stand harsh environmental conditions.

Outdoor CPE

Seowon Intech

Outdoor CPE

Outdoor CPE offers better performance over indoor CPE given that WiMAX reception is not impeded by walls of concrete or brick, RF blocking glass or steel in the building's walls. In many cases the subscriber may wish to utilize an outdoor CPE in order to maximize reception via a line of sight connection to the base station not possible with indoor CPE.

Contact our Membership Services Director, Mike Wolleben at mike.wolleben@wimaxforum.org for more information.

Join hundreds of industry leaders representing the entire mobile Internet ecosystem from silicon to content who are driving the adoption, deployment and expansion of WiMAX technologies across the globe today.

WiMAX Forum

The WiMAX Forum® is an industry-led, not-for-profit organization that certifies and promotes the compatibility and interoperability of broadband wireless products based upon IEEE Standard 802.16. The WiMAX Forum's primary goal is to accelerate the adoption, deployment and expansion of WiMAX technologies across the globe while facilitating roaming agreements, sharing best practices within our membership and certifying products. WiMAX Forum Certified® products are interoperable and support broadband fixed, nomadic, portable and mobile services. The WiMAX Forum works closely with service providers and regulators to ensure that WiMAX Forum Certified systems meet customer and government requirements.
